

Demonstration of Proposed Features

Date	15 March 2024
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document summarizes the key features proposed during the planning phase of the **Credit Card Approval Prediction** project. It shows the implementation status of each feature and confirms whether it has been successfully demonstrated.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Data Collection	Collected the credit card approval dataset from Kaggle	Implemented	Yes	Dataset successfully obtained.
2	Data Preprocessing	Cleaned missing values, encoded categorical data, and prepared the dataset.	Implemented	Yes	Data prepared for model training.
3	Exploratory Data Analysis	Analyzed and visualized the dataset to understand patterns and relationships.	Implemented	Yes	Charts and graphs generated.
4	Machine Learning Model	Trained and evaluated machine learning models for approval prediction.	Implemented	Yes	Best-performing model selected
5	Web Application	Developed a Flask-based web application for real-time prediction.	Implemented	Yes	Users can enter applicant details and receive predictions.
6	Model Deployment	Integrated the trained model with the Flask application for live predictions.	Implemented	Yes	Application successfully tested.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
