

Project Demo Planning

Date	15 March 2024
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo ensures that the project is presented clearly and effectively. This demo plan outlines the sequence of activities, highlights the key features of the **Credit Card Approval Prediction** system, and ensures that all major functionalities are demonstrated within the allotted time.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the project, objectives, and problem statement.	2	
2	Dataset & Model Overview	Cleaned missing values, encoded categorical data, and prepared the dataset.	3	
3	Web Application Demonstration	Analyzed and visualized the dataset to understand patterns and relationships.	4	
4	Model Prediction	Trained and evaluated machine learning models for approval prediction.	2	
5	Project Features	Developed a Flask-based web application for real-time prediction.	2	
6	Conclusion & Future Enhancements	Integrated the trained model with the Flask application for live predictions.	2	

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for an automated credit card approval prediction system.
2	Solution Overview	Describe the project architecture, machine learning workflow, and technologies used.
3	Live Feature Demonstration	Show the Flask application, enter sample applicant details, and display the prediction result.
4	Q&A Session	Answer questions related to the dataset, machine learning model, implementation, and future scope.
